Location: Bab City

About Me:

I am a programmer proficient in various languages and frameworks, including ASP.Net, Laravel, Ionic Framework, Meteor Framework, React, Flutter, and no-code platforms like Bubble. As a seasoned trainer and co-founder at Developers For Syria, I have successfully conducted Python language courses for beginners and intermediate levels. My expertise extends to collaborative teamwork, a crucial aspect of my role in various programming projects.

Work Experience:

Developers For Syria (Media Office Manager):

1/8/2022 - 12/10/2023

Managed tasks related to photography and social media publishing. Coordinated and organized media activities effectively.

Developers For Syria (HR Manager):

13/10/2023 - Present

In this role, I handle student registrations for training, facilitate training sessions and seminars, and manage groups. Accurately update human resources information to ensure smooth training operations.

Zad Group (Web Developer):

22/7/2023 - Present

As a web developer at Zad Group, I contributed to various development projects. Besides effectively using the Bubble framework, I updated and modified projects using the Ionic framework, enhancing application performance and user experience. I participated in creating a chat application using the React framework, developing an advanced user interface seamlessly integrated with servers. I also received training in project management and scenario creation using Cucumber, enhancing my skills in understanding and efficiently implementing project requirements.

Developers For Syria (Trainer):

As a trainer at Developers For Syria, I delivered distinctive Python programming courses at multiple levels, focusing on practical projects to stimulate interaction and enhance effective learning. I also provided specialized training in Scratch programming for children, teenagers, and programming beginners, aiming to foster understanding and interest through a creative teaching approach.

Projects:

Python Excel File Processing Project:

Implemented an advanced Python project for reading Excel files. Conducted complex calculations on data and presented results accurately and organized within Excel files, facilitating data understanding and utilization. [Project Link](#)

Contributions to Zad Group Training (Turkey - Online):

Actively participated in improving and modifying a project using the Ionic framework. Demonstrated effective teamwork by formulating project scenarios using the Cucumber Framework. Enhanced project integration and understanding through effective interaction with the team.

Creating a Website for Bina Organization Using WordPress:

Designed and implemented a website for Bina Organization using the WordPress platform. Customized and configured the frontend and backend interfaces to ensure an efficient and engaging user experience. Integrated content seamlessly and provided content management tools for easy updates and maintenance. [Project Link](#)

Education:

International University for Science and Renaissance, Izaz

1/1/2021 - Present

College of Computer Engineering

"1000 Programmer" Training Diploma - Madad Organization

2/10/2022 - 15/4/2023

Received intensive programming training as part of the "1000 Programmer" initiative by Madad Organization. Developed strong skills in the Laravel framework and implemented a practical project for a training course website. [Project Link](#)

React Framework Learning Path - "1000 Programmer"

As part of the same training, the learning path included studying the React framework. Implemented a practical project related to creating an e-commerce website using React, contributing to the development of my programming skills and improving my understanding of this modern framework.

Training:

Child Protection Training - SRD Organization

9-6-2023

First Aid Training - Al-Rawad Organization

1-9-2023

Presentation and Public Speaking Skills Training - Al-Rawad Organization

15-8-2023

Languages:

Arabic (Native)

English (Second language)

Skills:

My strengths lie in the diversity and mastery of working on various advanced work frameworks, including:

- ASP.Net: Excellent experience in developing web applications using ASP.Net, focusing on building strong and efficient solutions.
- Laravel: Wide familiarity with using Laravel as a powerful framework for web application development, emphasizing building advanced and reliable systems.
- Ionic Framework: Proficient application of the Ionic Framework in mobile application development, focusing on creating attractive and seamless solutions.
- React: Deep experience in developing user interfaces using React, with a focus on providing effective and inspiring user experiences.
- Flutter: Advanced skills in using Flutter for mobile application development, focusing on launching smooth and high-performance applications.
- Bubble: Extensive familiarity and experience in using the Bubble framework for developing applications without writing any code, fostering creativity and rapid execution.
- Microsoft Office: Proficient in using Microsoft Office programs, including Word, Excel, and PowerPoint, for efficient document creation, advanced spreadsheet preparation, and professional presentation crafting.
- Multi-language Programming: Specialized trainer familiar with multiple programming languages, reflecting diversity and the ability to adapt to different development environments, including the AI-powered image creation project.

- Collaborative Skills: Strong ability to work with a team spirit and effectively interact in collaborative work environments, contributing to achieving team goals.
